

Submission Guidelines

ICPC 2024 (Virtual, online synchronous) welcomes proposals for oral and/or poster presentations on **all aspects of children's speech sound development and use in typical and atypical contexts in monolingualism, bilingualism, multilingualism, early second language acquisition, dialects, and sign language phonology.**

Work on indigenous, minority, and under-researched languages is particularly encouraged.

The conference supports a multi- and inter-disciplinary approach across phonology, phonetics, interfaces with other grammatical levels, speech production, speech perception, psycholinguistics, clinical linguistics, sign language phonology, computational modelling, educational approaches, and the application of new technologies.

Theoretical, experimental, and clinical contributions are welcome.

Doctoral students, speech language pathologists, and representatives of minority groups are also especially encouraged.

Instructions for Abstracts

Abstracts are 300 words long (excluding references)

Provide 4-7 keywords. Doulos SIL is to be used for phonetic symbols.

Submit 2 files: word, inclusive of author(s), affiliation(s), email(s), **pdf** (anonymized version)

Preference for oral or poster presentation is indicated at the bottom of the word file.

Submission of Abstracts: by 22 January 2022
